convertable

converting a conventional table into a compact, stacking element..

convertable

CONVERTABLE with top in horizontal working position

CONVERTABLE incorporates a top that can be tilted, resulting in a vertically stacking table. The tilting action can be accomplished by any user with a simple stage of actions for a smooth and easy tilting process.

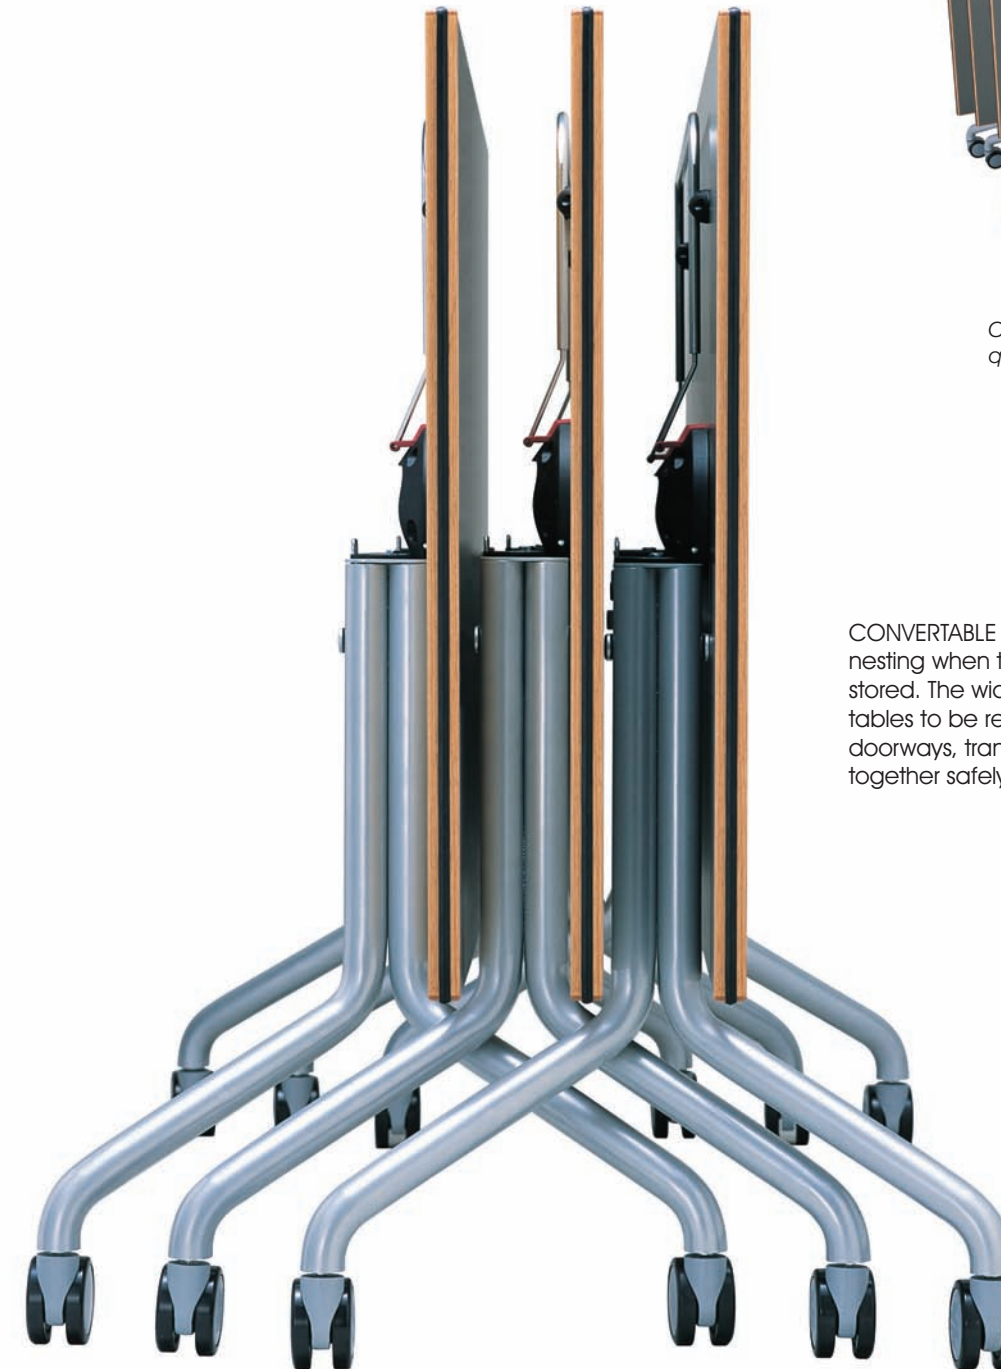

For multi-function work environments, CONVERTABLE offers a flexible and mobile solution that allows an every-day office area to be converted quickly and easily from conference to training, meeting to breakout or formal to informal applications.

CONVERTABLE with top tilted in vertical stacking position

CONVERTABLE stacks and stores quickly and easily

CONVERTABLE provides space efficient nesting when the product is stacked and stored. The width of the frame allows the tables to be relocated through narrow doorways, transported in lifts and stacked together safely and compactly.

convertable

CONVERTABLE is a light weight table and is manufactured from high-quality ERW tube. The tubing is finished with a high-temperature powdercoat and is precision detailed. A variety of top sizes and finishes can be selected to blend into any environment.

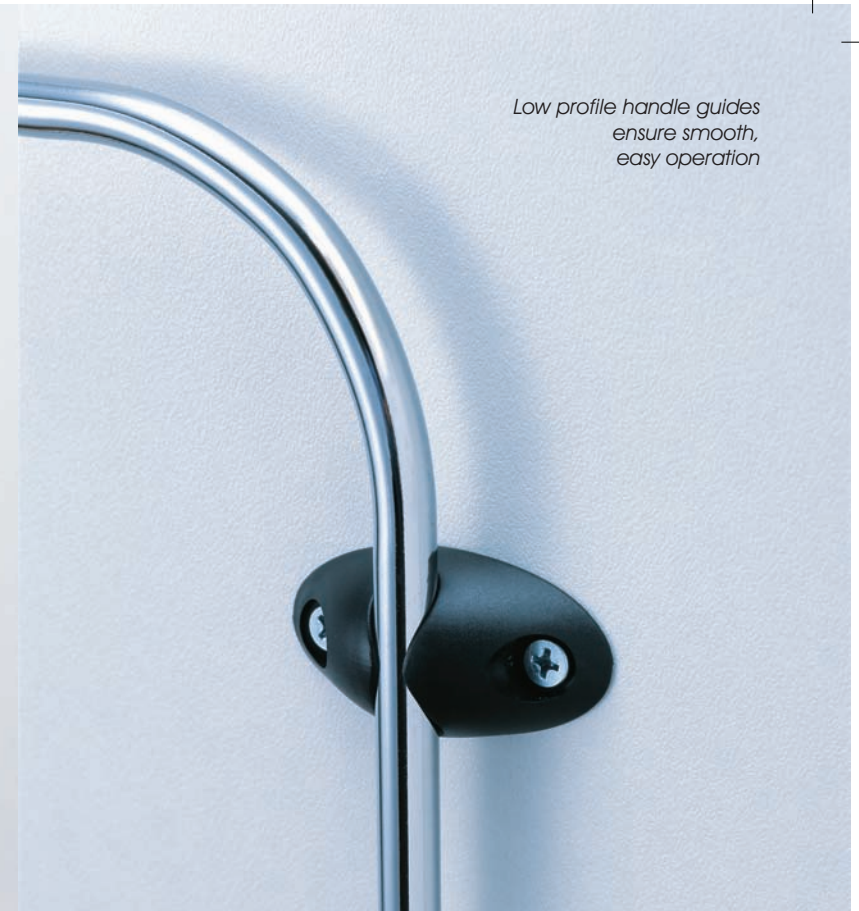

CONVERTABLE HARD-TOP with fixed-top and adjustable glide

CONVERTABLE SOFT-TOP with tilting top and locking castors

HARD-TOP (fixed-top) and SOFT-TOP (tilting-top) versions are available with identical frame details. Optional mobile castors or glides are available for CONVERTABLE HARD-TOP providing a multi-purpose desk for all requirements.

CONVERTABLE uses a high quality tilt mechanism

Low profile handle guides ensure smooth, easy operation

SOFT-TOP locking castors

HARD-TOP adjustable glide
